

PTFF-11 – “Galore Creek Mine, British Columbia”

Galore Creek Mine, 150 Km north east of Stewart in British Columbia, will be the largest open-pit copper mine in North America. Daily production will average 84,000 tonnes of ore concentrate per day.

Currently, access to the mine is only by helicopter. Phase 1 of future development is the construction of a highway, enabling ore to be trucked to Stewart.

Heavy road construction equipment will be airlifted to Stewart by Platinum Airways.

Suggested Aircraft:

Boeing B747-8F

Boeing B747 LCF
