PTFF-81 – “Hydro-Quebec”

---

Hydro-Quebec is a Canadian Government-owned, public utility established in 1944. Headquartered in Montreal, the company oversees the generation, transmission and distribution of electricity for the Province of Quebec. Generation relies almost exclusively on its 60 hydro-electric sites. The remote location of many sites means a reliance on air transport for employees, maintenance and spares.

**Conqair CV 580**

**Suggested Aircraft:**

Convair CV 580 (Freeware files for the CV 580 are available at [www.calclassic.com](http://www.calclassic.com) and the Quebec Hydro livery at [www.flightsim.com](http://www.flightsim.com)) Otherwise use appropriate aircraft.
